

Model 100GW Center Grip Bag Clamp High Speed Gross Weigh Bagging Scale

Effective Date: January 1, 2016

The Hamer Model 100GW high speed gross weigh bagging scale with (Center Grip Bag Clamp), brings true high speed, high accuracy weighing to gross weigh scales and offers outstanding performance in a small, easy to use package. A semi-automatic scale built of carbon steel or stainless steel, the 100GW (Center Grip Bag Clamp) utilizes a single pneumatically controlled, gravity feed gate and provides bulk fill or bulk/dribble fill for more accurate weighing. Dual load cell design improves accuracy, ensuring no off-center loading. The pneumatic bag clamp has a view window so operators are certain bag is properly positioned each time. The 100GW will automatically discharge bag when full, or use the auto bag hold to keep the bag in position for manual release. Minimum bag width – 8 inches.

Standard Features Include:

- Up to 16 BPM fill rate
- +/- 1.0 oz. accuracy, product dependent
- Dual load cell design improves accuracy
- Weight range 10lb to 100lb (5Kg to 50Kg)
- Big, bold backlit digital indicator display
- NEMA 12 control enclosure
- Heavy duty all-steel construction
- Powder coat finish
- Simple operation/set up
- Bulk/Dribble or Bulk Only
- Lbs/Kgs switching
- Automatic bag present
- Bag clamp/start switch

Options Available:

- Powder coat steel stand with 5 cubic ft hopper
- Powder coat steel stand with 35 cubic ft hopper, mild steel
- Powder coat steel stand with 35 cubic ft hopper, 304 SS
- Recommended spare parts kit Export
- Crating charge US/Export

Equipment Specifications:

- Dimensions width 25.72"; height 35.00"; depth 20.95"; uncrated weight 315 lbs.
- Electrical requirement 120V, 1PH, 60Hz, 3amps
- Pneumatic requirement 80 PSI, 2 CFM
